**Daryl Temkin, Ph.D.**  
Introduction Biography

Dr. Daryl Temkin received his Ph.D. in 1989 from the University of Southern California in Education and Counseling Psychology. His undergraduate and graduate degrees were accomplished at Hebrew University of Jerusalem, UCLA and Loyola Marymont University. Besides his work in counseling psychology, for the past decades, he has served as a guest lecturer at a number of academic institutions including Pepperdine University and Touro College.

He is the founder and director of the **Israel Institute for the Advancement for Alternative Energy Innovation**. This organization stands out as being the first not-for-profit organization for creating a scholarship fund for graduate students in science and engineering who are advancing alternative energy innovations. The Israel Institute also educates communities on topics of contemporary energy concerns and developments.

Dr. Temkin has served as the director of national leadership organizations. He was the founder and director of the nation-wide *American-Israel Emergency Winter Clothing Airlift* which shipped over 300,000 pounds of needed winter clothing to the Gaza evacuees and Israel's poor. He also served as the Western States Executive Director of the Zionist Organization of America.

Dr. Temkin originated a weekly adult Jewish education program called, *Teachings for the Soul*. For over 15 years, Dr. Temkin presented weekly lectures for this program which reached over a thousand students, including many non-Jews.

Finally, Dr. Temkin has been an active opinion writer on critical economic, social and political issues affecting Israel, America, and the world. He has published over 50 articles in a weekly column titled, *Pivotal Thought*. This column has been published internationally in Jewish, Christian, and Muslim publications and he has been the guest for talk radio and TV interviews.

Dr. Temkin's current effort is to address the national security issue of energy and foreign oil dependency. He is a leader in the effort to reduce and replace oil dependency with alternative fuels and fuel efficient alternatives.

His goal is to help the world free itself from the economic corruption and devastation of OPEC foreign oil dependency and the funding of international terror. This effort is far beyond a concern for the environment, but it is an essential mission required for protecting and insuring the future of Western values, freedoms, our economy, and our future civilization.
